ABOUT ME

I am a student at SLIIT, currently pursuing a BSc (Hons) in Information Technology. I am a responsible and motivated individual with strong knowledge of HTML, MERN Stack, SQL, Web Development technologies, and Quality Assurance practices. I am adaptable to different environments and eager to continuously improve my skills in both development and QA, including testing methodologies, bug tracking, and ensuring software quality. My goal is to maximize my abilities and contribute effectively to achieving organizational objectives while delivering value as a dedicated team member

WORK EXPERIENCE

Sampath IT Solutions – Colombo, Sri Lanka

SOFTWARE QUALITY ASSURANCE ENGINEER - TRAINEE

[26/03/2025 – 26/02/2026]

- Performed **manual functional testing** on FinTech applications including payment, transaction, and account-related modules.
- Analyzed **business and functional requirements** to design detailed **test cases and test scenarios**.
- Validated **financial transactions**, balances, fees, and reports to ensure accuracy and compliance.
- Identified, logged, and tracked defects using tools such as **JIRA**, ensuring clear reproduction steps and proper severity levels.
- Conducted **regression testing** after bug fixes and system updates to maintain application stability.
- Verified **data integrity** across front-end and back-end systems using SQL queries (if applicable).
- Collaborated with developers, business analysts, and senior QA engineers in an **Agile/Scrum environment**.
- Ensured adherence to **security, compliance, and quality standards** relevant to FinTech systems.
- Performed **data validation** using SQL queries to verify transaction records

SKILLS

Manual Testing / FinTech Application Testing / Test Case & Scenario Design / Defect Tracking & Reporting / Functional & Regression Testing / SDLC / STLC / Basic SQL / Jira / Bug Tracking / Performance Testing / API Testing

PROJECTS

Task Manager Application

- Developed a task management system to create, update, assign, and track tasks efficiently.
- Implemented **RESTful APIs** using Spring Boot for backend operations.
- Designed and managed **MySQL database schemas** to store task and user data.
- Built a responsive frontend using **React.js** for improved user experience.
- Conducted **manual testing** to validate task workflows, form validations, and error handling.
- Identified and fixed bugs to improve application stability and performance.

Technologies: React.js, Spring Boot, MySQL, Python

Salon Management System

- Developed a full-stack system to manage **appointments, services, staff, and customers**.
- Implemented CRUD operations using **MongoDB and Express.js**.
- Designed interactive UI components using **React.js**.
- Validated business logic through **manual functional and regression testing**.
- Ensured data consistency and accurate booking flows.
- Collaborated in planning, development, and testing phases.

Technologies: MERN Stack (MongoDB, Express.js, React, Node.js)

Grocery Ordering System

- Led the development team as the group leader, coordinating planning and design activities across members.
- Developed **User Feedback** and **Contact Us** modules with full CRUD functionality.
- Implemented backend logic using **Java, JSP, and Servlets**, following **OOP principles**.
- Designed and integrated database operations using **SQL** for data storage and retrieval.
- Ensured proper validation, data consistency, and smooth user interactions.
- Participated in system planning, development, and testing phases.

Technologies: Java, JSP, Servlets, SQL, OOP Concepts

Airline Ticket Reservation System

- Developed an **Airline Ticket Reservation System** as part of the IWT module.
- Implemented the frontend using **HTML, CSS, and JavaScript** to create an interactive user interface.
- Integrated the backend using **PHP** to handle server-side logic and workflows.
- Designed and managed database operations using **MySQL**.
- Implemented core features including **user registration, login, profile management, and account deletion**.
- Ensured proper data validation and smooth user interactions.

Technologies: HTML, CSS, JavaScript, PHP, MySQL

Frontend Development

- Actively solving **Frontend Mentor challenges** to enhance web development skills.
- Building responsive UI components using **HTML, CSS, and JavaScript**.
- Focusing on clean layouts, accessibility, and best frontend practices.

Technologies : HTML, CSS, JavaScript

To Do Mobile App

- Developed a mobile To-Do application to manage daily tasks and improve productivity. Implemented CRUD operations for task creation, updates, sorting, and deletion using Room Database.
- Designed a user-friendly and interactive interface using Kotlin in Android Studio. Enabled task organization by date, time, and title to ensure clear task prioritization.
- Ensured data consistency and smooth task workflows through proper validation. Participated in planning, development, and testing phases.

Technologies: Android Studio, Kotlin, Room Database

Math Quiz Game

- Developed an interactive **Math Quiz mobile game** to enhance arithmetic skills through engaging gameplay. Implemented multiple difficulty levels and game modes, including timed and relaxed challenges.
- Designed an intuitive user interface with vibrant visuals and simple controls for all age groups.
- Integrated instant feedback mechanisms to support learning and skill improvement. Participated in game design, development, and testing phases.

Technologies: Mobile Application Development , Android Studio, Kotlin, Game Development

EDUCATION AND TRAINING

Bsc (Hons) in Information Technology
Sri Lanka Institute of Information Technology [15/06/2022 – Current]

City: Colombo | **Country:** Sri Lanka | **Level in EQF:** EQF level 6
